

Dear Sirs:

I am a subscriber to XM Radio. Recently XM added traffic for my city (Pittsburgh), among others. I use this and find it quite useful, at times more useful than the reports on the broadcast stations, since it is a 24 hour service.

I have known about the monitoring systems that had been put in place on the major highways, but until XM started this service, I would have had to have an internet connection in my car to make use of it. Having this information on XM is a step forward for me.
